# Step by Step Guide

## How to Use This Guide

Below you will find the order of each lesson. Each step should be a link that takes you directly to the page of recommended reading.

Go in the order given to you here per lesson.

Here is a hint...this is the order I teach this information in all of my face to face classes, it's a proven method time and time again.

I recommend you NOT click around on the pages while consuming the recommended reading until you are finished with each course.

I don't want you to get side tracked or distracted. If you see something that intrigues you, make a note, go back and check it out after you are done. I have learned that what may seem interesting at the moment isn't later on.

You must commit yourself to remain focused working through this. Clicking around leads to distraction that gets you off track and can create confusion from lack of focus.

I highly encourage you...in the beginning...resist the click...stay on course.

If you get tired or feel yourself drifting then get up, take a break, stretch, walk away making note of where you were. Then when you are refreshed come back and continue with your lesson.

Ready? Then let's bead-gin.

Each lesson is a stand-alone session, you decide which project to start with. I allot 2 hours per class minimum.

I recommend printing these sheets and keep them in front of you. Make any and all notes on each page.

There will be some repeated lessons for each step by step guide simply because some of the information is the same for all three projects. I will leave that one for you to decide. Re-read or not?

Let's get busy and let's get beading.
